About a mile from Kingsland the train suddenly came to a stand-still, and Conductor J. B. Browning stepped to the deer to see what was stepped to the deer to see what was wrong. As he opened the door a bullet whistled by his head, and he at ence retired inside of the ear, where he remained during the trouble. The robbers went to work in a cool and systematic way. They hoarded the engine and comman, Ed Hacknott, to hold up thoir han is Hnekaett was just in the act of putting a shovel of coal in the fire-box, and, supposing it was one of the trainmen trying to perpetrute a jeke, hold up his shore, sxclaiming, "At there?" The robbe; with grim humor, dropped the muzzle of a six-shooter against the fireman's check, with the words: "Stay there, you." The firemnn quickly elimbed down from the hox. Taking the fireman and engineer with them, the rebbers ordered them to call on the messenger to open the car.
They did as ordered, but he refused to
show up. Then hegan a fusliande which

store thu other day, and one of them bought and pald for two cigurs. The clgars cost ten cents each, and the man who sold them handed back, in change for the silver dollar that had been tendered him, eighty reats in ten-cent pleces. Thereupon one of the young men laughed voelferously, and the other, who bought the elgars, pocketed the eight dimes, with an expression ap proaching chagrlu, and said: "Just my luck, by George! However," said he, after lighting his elgar, "if there's any more spending to be done, old follow, you've got to do lt, fur I'm broke." When the young men left the store,

the eight man turned to a reporter who had witnessed the transaction and said:

"Do you know what that means?"
"No." "It means that the young fellow who bought the elgars is at the same time eighty cents ahead and eighty cents bohind. He is ahead in money that he will save and behind in money that he probably wanted to uso today.

"I dan't umlerstand you." "Well, the young man has simply eaught the dime-saving craze." "And what is the dlme-saving

eraze?" "The scheme is never to spend a dinm. It was probably devised for the benelit of thriftless people who are not able to save their money in a regular way, and for a plan of saving money it is the best I ever heard of. You make up your mind to keep every dime that comes in your possession. You are nover to part with a ten-eent pleco under my circumstance. Whenever you receive a d'me la change put l away, and when you get home place !! In a receptable for safe-keeping. The more dimes you get in change the greater your savings will be. You are to make any sacrifleu rather than to part with one dime. If you have nothing but dimes in your pocket who you want a eigar, go without the elgar. If you want lunch and have nothing but dimes, go without lunch. If you have only a dime in your pocket and want to rido home on a lorse car braco up and walk, the result will

Science says that it does, but we can not holp wondering sometimes if there is a't some mistake about it, whou we see how stubbornly cerlain old fogies cling to their musty and antiquated ideas. It was believed once that consumption was incurable, and although it has been clearly demenstrated that it is not, theusands of old-time physicians close their eyes and put their hands to their ears and refuse to abandou the theory. But for all that the world moves on, and Dr. Pierce's Golden Medical Discovery continues to rescue sufferers from consumptives' graves. It is a sure cure for this dreaded disease, if taken in time. All scretulous diseases—and consumption is included in the list—yield to it.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS.

And exclusively devoted to the treatment of all Chronic Diseases. This imposing Establishment was designed and erceled to accommodate the large number of invalids who visit Buffalo from every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of the State of skilled spectulate in medicine and sorgery that compose the Faculty of this widely-celebrated institution.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We carnestly invite you to come, see and examine for yourself, our inallintions, appliances, advantages and success in curing chronic diseases. Have a mind of your nwn. To not listen to or lessed the counsel of skeptical friends or fedicus physicians, who know mitting of us, mir system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeavier to prejudice people against us. We are responsible to put for what we represent, and if you came and visit us, and find that we have misrepresented, is quy particular, our institutions, advantages or success, we will promptly refund to you all oxpenses of your trip. We could house, sincere investigation, have no accrets, and are only too glad to show all interested and candid people what we are deling for suffering humanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

By aur original system of disgnosis, we can treat unany chronic diseases just as auccessfully willhout as with a personal consultation. While we are always gind to see our patients, and tecome acquainted with them, show them our listingly and tecome acquainted with them, show them our listingly and feadinglack them with our system of treatment, yet we have never one person in five hundred whom we have curved. The perfect accuracy with which scientists are erabled to deduce the most infunction in five hundred whom we have curved. The perfect accuracy will particulars in their several departments, appears a linear time and the process in the several departments, appears a linear time and the greatest intention of the age. Is it not a marriclous degree of accuracy which enables an operator to exactly least a fracture in a submarine cubic nearly thress thousand inlies long? Dur venerable what the most wayward elements of nature that he can necurately predict their movements. He can sit in Washington and forstell what the weather will to In Florata or New York as well as if several hundred miles did not interven believen him and the places numed. And so in sall departments of modeled to evitain what is required is the knowledge of evertain signis. From those scientists desines accurate conclusions regardless of distance. So, also, in medical science, diseases have restain unmistakable signs, or symptoms, and by reason of this fact, we have been consided to originate and jetteet a system of the fact, we have been consided to originate and jetteet a system of the street.

COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devoted him whole time to the study and investigation of a tertain class of discuss, must become latter qualified to treat such discuss than he who attempts to Ireat every ill to which flesh is betr, without giving special attention to say class of discuss. Non, in all ages of the workl, who have become tomous, have devoted their lives to some appeal branch of science, art, up literatures. literature.

If thereigh organization, and middleiding the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided attention to the particular class of disclose in which the case belongs. The diversity of this arrangement must be obvious. Medical selectes offers a vast field for investigation, and no physician case, within the brief limits of a life-time, achieve the highest degree of success in the treatment of every makely incident to humanity,

DISEASES OF DISEAS

KINNEY
DISEASES.

HRIGHT'S DISEASE, DIABETES, and kindred maindies, have been very largely treated, and corres effected in thousands of case which ind been principled to thousands of case which ind been principled to thousands of case which indices principled to the natural practice of chemical mulysis and interoscopical examination of the natural new consideration of cases, with reference to correct diagnosis, in which our institution long ago became famious, has naturally led to a very extensive practice in discusses of the principled principled to the principled to the principled to the principled principled to the principled to the principled principled by nuffers from this class of maindleans the oldard world-famed World'n Dispensary and Invalids' Hotel. Our specialists have acquired, through a vast and varied experience, great oxpertness in determining the cruct nature of each case, and, hence, have been auccessful in nicely adapting their remedies for the cure of each individual case.

These delies to diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to uscertain the exact readilton and stage of advancement which the disease has made (which can only be ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition are known to de positive tightly in others. We have never, therefore, attempted to put up may thing for general sale through drugglats, recommending to circ these diseases, although possessing very superior remedies, knowing full well from an extensive experience that the only saite and ancessafil for the carefully determine the disease and its progress in each case by a chemical and incroscopical exumination of the urine, and her adapt our medicines to the exact stage of the disease and condition of our patient.

WONDERFUL
To this wise course of action we attribute the marvelous success attained by our specialists in that important and extensive Department of our that important and extensive Department of our of diseases of the kidneys and hinder. The treatment of diseases of the urinary organs lawing constituted a leading branch of our practice at the invalids Hotel and Surgical institute, and, being in constant receipt of unmerous inquiries for a complete work on the nature and curability of fless includes, written in a niyle to be easily understood, wa have published at large Hinstranica Treatise on these diseases, which will be sent to any address our receipt of ten cents in postage samps.
